

## **AXEGAZ T&T achieves first in-tank operation at Elengy operated Montoir de Bretagne**

**August 2024** – AXEGAZ T&T is proud to announce a significant milestone its activity in France, achieving its first in-tank operation in Montoir de Bretagne, operated by Elengy.

This initiative marks a major step forward, as it involves a small-scale LNG trader engaging in direct in-tank operations, demonstrating increased flexibility and adaptability in LNG handling. AXEGAZ T&T has recently successfully completed the first in- tank LNG operation in Montoir.

Axègaz T&T is grateful and thanks Elengy for the success of this operation.

Small scale LNG activities are a natural complement to conventional LNG operations. They are, in fact, required to stimulate adoption of LNG in specific segments such as road transportation, where LNG, and in particular its decarbonised version bio-LNG, offers a fast and efficient energy transition option. With the growth of specialised small scale LNG players development of such segments will be greatly boosted.

Brigitte Morriello, AXEGAZ T&T’s chairperson declared: *“We are delighted to finally deploy in France our know-how hone over many years of trading in terminals elsewhere in Europe as a pure small scale LNG player. We are excited to continue innovating and expanding service offerings for the benefit of our customers. We look forward to further expand our LNG and Bio-LNG portfolio in France with more ground-breaking initiatives.”*
