

AXEGAZ T&T – First loading of BioLNG on a bunker vessel

June 2024 - First loading of bioLNG onto a bunker vessel by AXEGAZ Trading & Technologies at the Zebrugge LNG terminal. Building on our years of experience in refuelling LNG trucks and supplying various industrial customers, we are now expanding our services to the Maritime Sector.

BioLNG is an immediately available clean fuel, with a carbon intensity that falls well below the stringent RED II emissions limits, making it ideally suited to decarbonize the transportation sector. We pioneered the introduction of this fuel with a first supply to a refuelling station back in 2014, and we are thrilled to be contributing to its adoption in the maritime sector now.

This milestone consolidates the fruitful collaboration with Fluxys terminal, which we commend for its efficiency, demonstrating our shared commitment to Sustainable Energy solutions.

The AXEGAZ T&T team
