

AXEGAZ T&T gains access to EEX, n°1 exchange for spot Natural Gas in Europe

January 2024 – AXEGAZ T&T keeps steadily growing, and it has now been granted access to EEX trading platform, the n° 1 exchange for spot Natural Gas in Europe.

Needing no introduction, EEX is the most important LNG trading platform, offering natural gas contracts in 10 countries and 10 hubs across Europe. The product range covers spot, futures and options contracts for the major European gas hubs, as well as trading in location spread products between these market areas.

We at AXEGAZ T&T always strive to provide our clients with the most competitive conditions for their LNG needs. We did not satisfy ourselves with arranging optimal LNG by truck deliveries, and went all the way up the supply chain, taking positions in LNG terminals, becoming natural gas shipper, etc. in order to optimise our cost base.

Being able, now, to trade directly on the exchange the most commonly used indexes in the LNG market place, PEG (France), PVB (Spain), PSV (Italy), TTF (Netherlands), etc. will enable us to offer an unparalleled combination of price and flexibility for the LNG that we supply to our customers.

We are proud to have been admitted to the exclusive list of market participants that trade on EEX market place and we look forward to discussing with our clients the solutions that we can implement to address their LNG and bioLNG needs.

We would like to warmly thank the EEX team that has accompanied us at each step of the arduous and challenging admission procedure.

-The Axegaz team

We invite you to explore our LNG and bioLNG related services :
