

## AXEGAZ T&T Strengthens Its Position in the LNG Bunkering Market!

**Early 2025** – AXEGAZ T&T is proud to announce that it has reached a major strategic milestone: being accredited for LNG Truck-To-Ship (TTS) bunkering at **the Port of Zeebrugge**. Since receiving this certification, we have successfully carried out our first operations, marking a concrete step forward in our commitment to developing LNG and BIO-LNG bunkering.

For one of these operations, we used 100% bio-LNG, achieving our first carbon-neutral bunkering. This milestone aligns perfectly with the new **FuelEU Maritime regulation (EU Regulation 2023/1805)**, which mandates a gradual reduction in the greenhouse gas intensity of maritime fuels starting in 2025. By facilitating access to low-carbon alternative fuels, AXEGAZ T&T supports maritime transport operators in complying with these new requirements and transitioning toward more sustainable solutions.

Zeebrugge is just the first step in a broader expansion plan. We are actively working to obtain approvals in other strategic ports to provide our clients with even greater flexibility. **If you have specific needs, do not hesitate to reach out!**

With our dedicated infrastructure, rigorous delivery protocols, and growing presence in the bunkering market, AXEGAZ T&T makes LNG and bio-LNG accessible in a safe, efficient, and sustainable manner.

### **About AXEGAZ T&T:**

AXEGAZ T&T is a key player in LNG transport and bunkering, committed to supporting the energy transition and providing sustainable solutions for the maritime industry.
